Chair Update

Greetings from the IFIC Board to all of our members! I hope that this season finds you well and your work in prevention and control of infections highly successful.

Several of our regions are being asked to consider nominating a representative to the IFIC Board. Our rules of election dictate that when a position on the board is available, the member societies for that region can submit the name of a potential board member. What does the IFIC Board need in terms of a Board member?

The IFIC Board does not have a large staff to do its work, and so the members of the IFIC Board are all expected to carry out work to keep the IFIC organization moving forward. A position on the IFIC Board is not meant to be simply a prestigious appointment. Not only do board members take on the job of strategic direction of the organization, but also of carrying out much of the hard work that will accomplish our goals. If your society is considering submitting a name of a candidate for the board, please make sure that they are willing to carry out the tasks required of board members. For example, most board members are required to make repeated contact with the member societies in their region. There are also committees that carry out tasks on the Education Committee, Membership Services, and Publications Committee to mention a few. If your society has been contacted about the upcoming election, please consider submitting the name of an energetic candidate who would be willing to work hard at their assigned board activities.

If you have questions about this or any other IFIC issues, please contact me.
Terrie B. Lee, IFIC Chair  tleewv@msn.com

2017 IFIC CONFERENCE

IFIC2017 will be held in association with Associação Paulista de Epidemiologia e Controle de Infecção Relacionada à Assistência à Saúde in the beautiful city of São Paolo, Brazil. The Centro de Convenções Rebouçãs (Conference Center) is: https://plus.google.com/108761976478337888199/about  More details will be released later in 2016.
Acknowledging Candace Friedman for her Contributions to IFIC Publications

We want to recognize Candace Friedman (Candy), Senior Project Manager in the Office of Clinical Safety at the University of Michigan Health System, Ann Arbor, Michigan, USA for the major contributions that the IFIC Board of Trustees and member societies have enjoyed under her leadership. Candy served as Chair of the Publications Advisory Board covering: 1) IFIC’s Basic Concepts Textbook since 2003 and 2) IFIC E-News since 2006. Candy is officially transitioning out of the IFIC editorship of these 2 publications in 2016; however, she graciously consented to share some of her challenges, personal satisfaction and lessons learned during the past 13 years.

Basic Concepts Textbook: Challenges, Personal Satisfaction and Lessons Learned

Pat Lynch, one of IFIC’s past president contacted Candy by email in 2003 with this request “IFIC was in urgent need of a professional volunteer who could do very challenging editing of a 95-page manuscript within a very short timeframe”. Ms. Lynch explained that the IFIC Basic Concepts manual had been in revision for months and it had an important deadline soon approaching; the editing had to be done by March 31, 2003 to qualify for a substantial grant from the Canadian Ministry of Health to pay for the French translation and printing of copies of the text which would also be very helpful to use in West Africa.

After Candy engaged in many thought-provoking hours, the 2003 edition was published. Since then she has led the revision of the 2006, 2011 and 2016 Basic Concepts editions. One major change is that the 2016 edition is only available as a free electronic download from the IFIC website. Candy explained that the greatest rewards of editing this text was managing it to completion and coordinating all of the requests from member societies and individuals all over the world. In addition, she communicated that her greatest challenges were differences in the: 1) language of the authors and 2) social norms and health systems among authors and reviewers. Finally, she learned important lessons to pass on to the new editor, “Be open to new ideas, be patient—not everyone in every country thinks the same way that I do”!

IFIC E-News: Challenges, Personal Satisfaction and Lessons Learned

E-News replaced the previous IFIC Newsletter in 2006. Mary Castle White, Coby Paardekooper and Gertie Van Knippenberg-Gordebeke had been the previous editors of the IFIC Newsletter. Before 2006 1-2 issues were published annually with support from a corporate sponsor for printing and distribution. Due to the increased use of the Internet, the Board decided to transition to an electronic format.

Candy enjoyed the challenge of putting together IFIC E-news. Without being restricted by the cost of printed pages, she was able to increase the number of issues to 4 annually. She was challenged by meeting deadlines as she worked with all the contributors of the quarterly news. Once again she learned to be patient. Her most precious memories of volunteering for IFIC came from getting to know the board members - amazing, hardworking individuals. Finally, she expanded her perspectives about global issues and solutions in different regions of the world through attending IFIC conferences to learn from and network with infection prevention experts.

During 2016 transition, Candy has kindly offered to mentor the incoming Chair of Publications, Jeanne Pfeiffer.
The IFIC Mentor Exchange Scholarship Grant and Application Process

The Mentor Exchange Scholarship Grant was established to offer an opportunity for mentorship exchange between a mentor from a centre of expertise and a student from a low/medium resource centre to facilitate the sharing of knowledge and expertise in order to achieve best practice in infection prevention and control. The mentoring/twinning project allows for fostering a close working relationships between a centre of expertise in a developed country, and a facility in a less developed country, all for the purpose of enhancing educational experiences between these entities.

Please review the following guidelines carefully and submit your proposal in the requested format. Go to http://theific.org/successful-candidates-of-the-mentor-exchange-scholarship-grant/ and Submit the completed application form to mesg@theific.org. Application deadline is 30 November, 2016.
IJIC has just published its latest edition: Vol 12, No 2 (2016)

**INVITATION TO SUBMIT MANUSCRIPTS**

We invite you to submit your manuscripts to be considered for publication in the International Journal of Infection Control (IJIC). The aim of the journal is to provide a forum for infection control (IC) professionals to disseminate research and practice information and encourage IC initiatives on an international level.

The journal is fully electronic and can be accessed at [http://www.ijic.info](http://www.ijic.info). The submission is performed online and you can keep track of the whole process in the authors’ section of the IJIC website. You may access more information for authors about the categories of manuscripts that we are seeking at the web site above. We are looking forward to your submissions.
World Health Organization: Immunizations, Vaccines & Biologicals

Global immunization coverage sustained in the past five years

Geneva, 15 July 2016

The latest WHO and UNICEF data on global immunization coverage show that 86% of the world’s children received the required 3 doses of diphtheria-tetanus-pertussis containing vaccines (DTP3) in 2015, a coverage level that has been sustained above 85% since 2010.

As a result, the number of children who did not receive routine vaccinations has dropped to an estimated 19.4 million, down from 33.8 million in 2000. However, this progress falls short of global immunization targets of the Global Vaccine Action Plan (GVAP) for the Decade of Vaccines of achieving 90% or more DTP3 vaccination coverage at the national level and 80% or more in all districts in all countries by 2015.

This article also covers the: 1) gaps in immunization coverage, i2) inequities in immunization coverage, 3) underutilized vaccines, and 4) the creation of an advisory panel to track global vaccination uptake. To see the complete article go to:

BASIC CONCEPTS—THE NEW 2016 EDITION!

The 2016 edition of IFIC Basic Concepts of Infection Control is now available at http://theific.org/basic-concepts-book/. This 3rd edition builds on its predecessors, enhancing and updating in a scientific way the knowledge required as a foundation on which local policies and procedures can be developed. All English language chapters have been reviewed and brought up-to-date by an international panel of experts; several new chapters have been added to ensure this new edition provides a sound comprehensive knowledge base. As before, the infection prevention and control principles set out in this book are applicable to all health care settings, however, particularly to areas where infection prevention and control is still in its infancy.

The 2011 Edition is available in Spanish, Italian, French, Hungarian, Arabic and Bulgarian thanks to BD, Meiko, IFIC Board members, and our member societies.
Course On Behaviour Change in Infection Prevention & Control and Antibiotic Stewardship

COURSE DESCRIPTION

Target Audience
The course was developed for experienced professionals (including doctors, nurses, administrators) and is especially useful for those leading infection prevention & control (IPC) and antibiotic stewardship teams, having direct input into the planning and implementation of programmes designed to improve compliance with cornerstone practices such as hand hygiene, antibiotic stewardship, care bundles etc.

Course Description
This highly intensive and interactive 3-day course will study human behaviour theories as well as behavioural drivers and modifiers identified in sociology, psychology, and anthropology literature and assess their relevance to IPC and antibiotic stewardship. Interventional techniques related to adult education, human factors modification and behaviour change will also be presented. Models for change, which have proven successful in other settings and in industry, will be explored, together with possible ways of adapting them successfully to IPC and antibiotic stewardship.

Course attendance will be limited, and delegates will be seated in small groups to facilitate dialogue and sharing of experiences. This course will be highly interactive in its delivery. A workshop-type discussion format will be adopted. There will be ample opportunity to share experiences, as well as learn new techniques directly relevant to your work. All lecturers and moderators are experts in their topics and have published research and/or presented in international fora.

BACKGROUND
Despite several decades of evidence based recommendations, studies continue to show that compliance with guidelines for IPC and antibiotic use remains generally sub-optimal. It is becoming clear that, just as much as medical knowledge, competence in social sciences and behaviour change needs to become an essential component of the skills that IPC professionals need to possess. Unfortunately, this crucial component is often lacking both in conventional training courses as well as mainstream literature.

COURSE DATES AND REGISTRATION

Dates: Monday 15th to Wednesday 17th August 2016.
Venue: Nofima Conference Centre, Bregenforget 3,
Aker Brygge, Oslo, Norway

Accommodation: Meals are available at the nearby Thon Hotel Villa Atrium, when booking please specify: Block ID: 140816, Ref.no. 2429502, Rikshospitalet conference 14th to 17th August, e-mail: vilka.restaurant@olvathon.no.

Room rates (inclusive of breakfast and free WiFi):
- 14-15.08.16: NOK 1150,-
- 15-16.08.16: NOK 1291,-
- 16-17.08.16: NOK 1291,-

Registration fees:
Norwegian delegates: e-mail: astember@ous-hf.no
International delegates: Contact Anne Margrethe Stenberg for registration: e-mail: astember@ous-hf.no

Registration fees:
Delegates from Norway: NOK 2 900
International delegates: EUR 330

The booking of the course is binding. Deadline for booking: 31st July.
Course fee includes: course materials, lunches and refreshments.

PROGRAMME

DAY 1 MONDAY 15TH AUGUST 2016
09.00 - 09.10 Registration
09.10 - 10.30 Welcome introduction of participants
10.30 - 11.00 Coffee break
11.00 - 12.00 Understanding the fundamentals: Experiential learning theory.
Dr Geirbjorg Carstens
Oslo University Hospital, Norway
12.00 - 13.00 Lunch
13.00 - 15.00 Understanding the fundamentals: Behaviour change theories.
Dr Geirbjorg Carstens
Oslo University Hospital, Norway
15.00 - 15.30 Coffee break
15.30 - 17.00 Applying behaviour change theories to infection prevention & control and antibiotic stewardship:
Prof. Michael A. Borg
Malta

DAY 2 TUESDAY 16TH AUGUST 2016
09.00 - 10.00 Communicating change initiatives more effectively: Appropriate techniques in adult education.
Prof. Kai Lunde
Glasgow Caledonian University, Scotland
10.00 - 10.30 Coffee break
11.00 - 12.00 Developing effective teaching sessions and evaluating learning outcomes.
Prof. Kai Lunde
Glasgow Caledonian University, Scotland
12.00 - 13.00 Lunch
13.00 - 15.00 Planning behaviour change strategies and adapting them to infection control.
Prof. Michael A. Borg
Malta
15.00 - 15.30 Coffee break
15.30 - 17.00 Planning behaviour change strategies and adapting them to infection control.
Prof. Michael A. Borg
Malta

DAY 3 WEDNESDAY 17TH AUGUST 2016
09.00 - 10.00 Social marketing as a tool to achieve sustained behaviour change in infection prevention & control.
Prof. Enrique Castro Sanchez
Imperial College London, England
10.00 - 10.30 Coffee break
11.00 - 12.00 Using social marketing to design effective behaviour change intervention programmes I.
Prof. Enrique Castro Sanchez
Imperial College London, England
12.00 - 13.00 Lunch
13.00 - 15.00 Using social marketing to design effective behaviour change intervention programmes II.
Prof. Enrique Castro Sanchez
Imperial College London, England

The programme may be subject to change.
IPAC CANADA CELEBRATES 40TH ANNIVERSARY

In 2016, IPAC Canada celebrates its 40th Anniversary. Various celebratory activities include events at the 2016 conference and an upcoming 40th Anniversary Supplement to the summer issue of the Canadian Journal of Infection Control.

The 2016 National Education Conference was held in Niagara Falls, Ontario (May 15-18). At this amazing, scenic location, we hosted over 500 attendees. Education sessions included a presentation by Professor Didier Pittet on Infection Prevention: From Care Bundles to Multimodal Interventions. Dr. Pittet gave examples of implementation strategies varying from pure care bundles to the use of multimodal strategies. Plenary sessions also included a discussion of ‘One Health’, which integrates medicine/public health and veterinary medicine/agriculture; Clostridium difficile and the global burden of diarrheal disease; a discussion on Patients, Residents and Families – What should they know; and a most interesting lecture on MERS CoV and the issue of emerging diseases in under-resourced jurisdictions.

Every conference comes with an element of fun. The local chapter, IPAC Central South Ontario, hosted a Meet & Greet with the fun of a photo booth and many selfie opportunities. The main event was a gala 40th anniversary celebration dinner at The Elements Restaurant which overlooks The Falls. The evening of dining and dancing was capped by an amazing display of fireworks.

The annual Run or Walk for IFIC was held on a very chilly morning. Over 75 participants braved the cold and damp but were treated to an invigorating 5K run or 2.5K walk beside the Falls. The Run resulted in a donation of over $4,000 CAD for the IFIC Scholarship. Winners were:

- Fastest Female Runner – Kris Cannon
- Fastest Male Runner – Jacin LaPointe
- Fastest Walker (Tie) – Joanne Archer/Patsy Rawding

Our 2017 conference will be held in Charlottetown, Prince Edward Island (June 18-21), where we will celebrate Canada’s 150th birthday! We hope many of our international colleagues will join us. IPAC Canada is also offering an International Attendee Scholarship at: [http://www.ipac-canada.org/](http://www.ipac-canada.org/)

Information |
As in the past our community of users drive what we provide: the National Resource for Infection Control has now received a ‘face-lift’ using a new cutting edge technology and will be re-launched as the ‘International Resource for Infection Control (iNRIC) 2015 as part of International Infection Prevention Week 2016.

A research grant "NRIC meets ICAN" has also enabled us to reach out to our international colleagues in Africa. A survey study identifying infection prevention and control information needs of healthcare staff in Africa led the expansion of the evidence-based resources on iNRIC to support infection control professionals with local resources at the point of care in Africa. We also have exciting developments underway using mobile technology, apps and game-based training. [www.nric.org.uk](http://www.nric.org.uk)
